create a

beautiful

bathroom space

with millennium

millennium offer a comprehensive range of bathroom, kitchen and laundry products.

Mixers, showers, accessories, tapware, baths and basins are available in suites of matching shapes and styles and come in a variety of beautiful finishes.

Modern, innovative design is a key feature of the millennium story along with quality construction and great value.

watermark certification & the WELS water conservation scheme

Watermark Certification

The WaterMark Certification Scheme is a mandatory certification scheme for plumbing and drainage products to ensure they are fit for purpose and appropriately authorised for use in plumbing and drainage installations.

Millennium mixers, showers and tapware are manufactured to comply to Australian Standards relevant to plumbing products and are Watermark certified.

WELS - Water Conservation

The Water Efficiency Labelling and Standards (WELS) scheme is Australia's urban water saving scheme. WELS reduces demand for high quality drinkable water by informing consumers about water efficiency at the point of sale.

Millennium showers, mixers and spouts, where required to be, are rated between 3 star and 5 star for their water efficiency under the Federal Governments WELS scheme. Millennium is fully committed to water conservation in Australia, the driest continent on earth.

tapware plating process

ELECTROPLATING

The majority of Millennium mixers, tapware, showers & accessories are electroplated. Electroplating is the process of plating one metal onto another by a process called hydrolysis. Multiple layers are applied during the process ensuring on-going adhesion and excellent durability. Note that the brushed nickel finish also comes with a protective oil coating which gives the finish greater stability & durability.

Used on: chrome | matte black | brushed nickel

PVD - PHYSICAL VAPOUR DEPOSITION

PVD - physical vapour deposition describes a variety of vacuum deposition methods which can be used to create thin films and coatings. PVD finishes are extremely hard and durable. All Millennium products that are finished in PVD also come with a protective oil coating which gives the finish greater stability & durability.

Used on: modern brass | brushed gun metal

ceramic disc cartridges for mixers

Ceramic disc cartridges are the engine that drive a single lever mixer or faucet. Millennium mixers predominantly feature KCG ceramic disc mixer/faucet cartridges. KCG is the only truly recognised brand of mixer/faucet cartridges manufactured in Asia. Millennium have used KCG for over 20 years and have no hesitation in offering 15 year warranties on these brilliant products. Nothing tests the quality of a cartridge like Australia's very high water pressure. KCG pass every time and offer many years of maintenance free use.

mixer & tapware collection

introducing the **SQ range**

The all new SQ range is a collection of architecturally designed, minimalist mixers, tapware, showers and accessories. These elegant products all feature “soft square” radius corner backplates that beautifully complement today’s ever growing range of “soft square” vanities, basins and mirrors. This versatile range has mixers & tapware available with pin style handle, paddle style handle and a no pin minimalist handle.

Millennium's Ultra Fine Basin range feature basins that have ultra fine, thin walls that meet the bench top at ninety degrees. This allows for a clean, neat connection to the bench top. Finesa, Akemi & Zoya are generously proportioned basins that offer a luxurious look when paired with modern full depth vanity units. Note, plug & wastes not included with basins.

Warranty Statement:

Our Goods come with guarantees that cannot be excluded under Australian Consumer Law (ACL). You are entitled to a replacement or refund for a major failure and for compensation for any reasonably foreseeable loss or damage. You are also entitled to have the Goods repaired or replaced if the Goods fail to be of acceptable quality and a failure does not amount to a major failure.

In addition to the lawful obligations above Millennium offer the following Extended Warranty.

All Millennium products are manufactured to the applicable Australian Standards. Millennium products are constantly monitored for quality control during and after the manufacturing process.

1. Millennium Residential Warranty Periods:

Subject to section 3 below, Millennium Warranty Terms, Millennium warrants the products listed below for any consumer installing them in a residential dwelling - house, townhouse or apartment - will be free from defects of materials or manufacturing faults for the periods listed below from the date of purchase.

* Tapware perishables such as tap washers, o rings and seals have a 1 year warranty,

3. Terms of Warranty:

Warranty will not apply if the following cannot be proven to have been adhered to:

That the product was installed by a licenced plumber.

That the installation was done according to all instructions enclosed with the product and any statutory regulations that may apply.

That the product was not damaged during installation.

WARRANTY | NOTES | CLEANING TIPS

3. Terms of Warranty continued:

That abrasive or corrosive cleaning products have not been applied to the product.

That installation or use of the product was not contrary to what was stipulated in the installation instructions.

That isolation stop cocks were installed in the line before all bathroom, kitchen and laundry tapware.

That the water pressure does not exceed 500KPA.

That in dwellings using tank water an inline filter is fitted between the tank and the dwelling.

That when mixers or tapware fail and leak water the water supply to the faulty product is turned off at the isolation cocks and not turned back on until all service work is completed.

4. Warranty Notes:

If a warranty issue is attended to by Millennium or an authorised agent and the issue is found to have been caused by incorrect installation or is not due to a manufacturing defect Millennium reserve the right to charge a service call fee.

Any warranty service repair work carried out by plumbers/builders or consumers, prior to written consent being given by Millennium, will void all future warranty claims on that product.

Warranty is not transferable and is only applicable to the original purchaser of the Millennium product.

Millennium basin and sink mixers are supplied with rubber washer seals for the base that, in most cases, prevent excess water leaking into cabinets below. Hence, silicone sealant, which can affect some colour finishes, should not be applied to the base of mixers. There are exceptions to this rule: when sink or basin mixers are fitted to a non-machined and uneven surface on a counter-top, basin or sink that is obviously bumpy or rutted then silicone must be applied to seal the base of the mixer to prevent water leaking into cabinetry. Warranty does not cover damage to cabinets caused by excess water leaking through base of a mixer fitted to an uneven surface and not sealed.

When lodging a Millennium warranty claim proof of purchase in the form of the original invoice/receipt is required prior to service work being commenced.

5. General Notes:

WELS or Water Efficiency Labelling Scheme is a compulsory federally legislated water saving program for tapware and other devices that use water. Under this legislation most mixers and tapware are fitted with flow controlling valves that reduce water use. In areas with high water pressure some flow controlled mixers or tapware will emit more noise than older tapware that is not flow controlled.

5. General Notes continued:

Excess noise emitted by flow controlled mixers or tapware in high pressure areas is not a product fault and not covered by warranty.

Scratches and marks caused by rings, fingernails, toothbrushes or various containers used in bathrooms are not covered by warranty.

Storing bleach and cleaning products, laden with corrosive chemicals, in bathroom or kitchen cabinets in close proximity to mixers can lead to major flooding. Corrosive vapours leach from containers and over time can cause degradation in the stainless steel casing on the flexible connectors that connect mixers to the water supply. Water damage caused by corrosive chemical vapours which damage flexible connectors is not covered by warranty. Note that laundry and dishwasher powder and liquid detergent do not emit corrosive vapours and can be safely stored near tapware.

When installing bathroom accessories and showers always use the product as your template prior to drilling holes. Measurements given in current drawings are subject to change without notice.

Cleaning Tips - Tapware | Showers | Accessories:

Never clean tapware/showers/accessories using chemical or citrus based cleaning products or abrasive cleaning pastes and powders.

Where tapware remains dry in use, a soft cotton cloth can be used to remove dust.

For a more thorough clean on chrome finish products Millennium recommends regular wiping down of product with a soft cotton cloth dipped into a warm soapy water solution (less than 1% liquid soap). Thoroughly rinse off soapy water with cotton cloth using fresh water only. Finish cleaning by gently drying off tapware with another dry cotton cloth. For a more thorough clean on all finishes apart from chrome, Millennium recommends regular wiping down of product with a moist cotton or microfibre cloth **using water only. Note, on all finishes other than chrome Millennium recommends that only water is used as a cleaning agent.**

Failure to follow the cleaning instructions above on all Millennium products will result in damage to product finishes not covered by product warranty

All product details, including images, WELS ratings, technical and warranty data were current at the time of this product catalogue going to print. Millennium reserve the right to change specifications without notice. Note that colour finishes printed in this catalogue may vary slightly from actual product.
